2. PRODUCT DESCRIPTION

Static Dissipative Laminates™

The unique characteristics of Nevamar Static Dissipative Laminate™ makes it ideally suited for a variety of electronically sensitive applications. The new enhanced product (patent pending) meets or surpasses all standards for electrical properties even at low humidity levels. The product also practically eliminates surface shedding to provide a tough, durable work surface that outlasts competitive materials.

Nevamar's exclusive Armored Protection™ reduces surface shedding to one-tenth that of conventional laminates and provides long-term resistance to surface abrasion and extends the life of the laminate by maintaining its surface texture.
